

Responsive web design

Sections in this chapter:

1. Responsive web design

2-1. Responsive web design

Q What is more disturbing than a website that is not user friendly when visiting it in a mobile browser?

2-1-1

A **Well, probably a lot!**

2-1-2

But it sure is disturbing.

One of those sites could be [Natur&Kultur's website](#).

2-1-3

The use of smart phones, tablets and various devices keep growing which makes it almost **unavoidable to ignore responsive web design**.

2-1-4

When we process responsive web design we provide **better accessibility** and **optimal viewing experience** to the user through different devices.

2-1-5

The goal is to have a layout that **automatically adjust** and adapts to **any device and screen size**.

2-1-6

We can use [Adlibris](#) as an example of responsive web design.

2-1-7

We want our website to look good and to be easy to use on **desktop, tablet and mobile phones**.

2-1-8
